SPECTRONIC ANALYTICAL INSTRUMENTS AN ISO 9001:2000 REGISTERED COMPANY

Spectronic Analytical Instruments are constantly trying to improve their marketing to ensure that you receive information that is pertinent to your industry. With this in mind welcome to the first newsletter aimed at the chemical industry. If there is anything missing, that you would like to see on future newsletters, please complete the fax back overleaf.

WHAT'S NEW FOR YOU?

BWB FLAMEPHOTOMETER

As exclusive UK distributor, **Spectronic Analytical Instruments** are pleased to announce the launch of the BWB-1 Performance plus multi element Flame Photometer. This is capable of doing Na, K, Ca, Li and Ba, simultaneously.

The instrument was first introduced at AICHEM to

a buzz of excited interest. The aim of BWB is to shake up the current market with the introduction of a series of products exceeding all expectations, with new levels of usability, quality and value.

The instrument's versatility and unique features were identified by the first customer Spectronic demonstrated its capabilities to by placing an order immediately.

To discover more about this instrument visit our website at www.spectronic.co.uk. To discuss your requirements further or to organise an on-site demonstration please contact our sales team.

shop @ www.spectronic.co.uk

Spectronic Analytical Instruments have recently opened their on-line shop. Users can easily identify their consumable requirements and place a secure order on-line.

The website carries comprehensive descriptions of all instruments in the Spectronic range, to allow the user to find the instrument to fit their application and requirements.

Regularly updated news keeps the reader in touch with developments in instrumentation advances and the special offers section carries ex-demo instruments and special offers available to the end user.

CAMSPEC M108 M508 M501

The European distributors of the **Camspec** range of spectrophotometers met in November 2007 in London for the official launch of the **Camspec M108 and M508**.

Spectronic Analytical Instruments were asked to do a presentation on marketing, selling and servicing the instruments as the company's most successful distributor over their 21 year relationship with Camspec.

Spectronic feel that Camspec have a well integrated product range, which means there is a model to suit all the day to day uses and applications we encounter for UV/Vis spectrophotometers. The products are highly reliable, accurate and competitively priced. Spectronic is built around high levels of customer service and with the Camspec products we feel we can confidently offer this.

To find out more about the Camspec range visit our website at www.spectronic.co.uk or contact our sales team.

CHEM

LUMEX MERCURY ANALYSER

The Lumex advanced **mercury analyzer RA-915+** is a unique all-purpose high sensitivity analytical instrument for the environmental monitoring, especially for the real time **detection of mercury vapor** in air, **mercury detection** in water, natural

and stack gases, oil and condensate, solid and sediments, foodstuff and so on.

To arrange an on-site demonstration, please contact our sales team.

J57 REFRACTOMETER

The **Rudolph Research Analytical J57 Refractometer** was designed to meet the unique needs of industrial environments where the refractometer is operated on the factory floor. A single flat measurement surface, electronic temperature control and a one button measurement capability make it perfect for high wear and tear and heavy use applications.

To discuss your applications further please contact our sales team.

INTERPECTRUM FT-IR

Since its launch in the UK in June, **Spectronic Analytical** have sold several **Interspectrum 200-X FTIR/FT-NIR** spectrophotometers into industrial, educational and pharmaceutical establishments. The customers were impressed with its high performance, unique features and cost effective pricing.

The **200-X** is unique in its optical, software and firmware design, with the objective of reducing overall analytical times. This instrument is ideal for the research or QC laboratory with its optional software packages to cover all areas. This software can provide libraries and IR analysis to determine compounds within samples and CFR21 part II compliance

The instrument provides impressive results when

paired with an array of accessories including ATR, diffuse reflectance and gas cells. This instrument is suitable for any industrial laboratory or

university environment and if required, a portable version is available for applications outside the laboratory in remote locations.

To obtain more information or to organise a demonstration please contact our sales team.

Spectronic accept payment via Visa, MasterCard, Visa Debit cards, Maestro, JCB cards and Visa company purchasing cards.
